

Use of radio frequencies

- | | | | | |
|---------------------|-----------------------------|------------------------------|---------------------------------|---------------------------------------|
| Mobile | Fixed-satellite | Radionavigation-satellite | VLF (Very Low Frequency) | VHF (Very High Frequency) |
| Maritime mobile | Mobile-satellite | Maritime radionavigation | LF (Low Frequency) | UHF (Ultra High Frequency) |
| Aeronautical mobile | Broadcasting-satellite | Aeronautical radionavigation | MF (Medium Frequency) | SHF (Super High Frequency) |
| Land mobile | Meteorological-satellite | Radionavigation | HF (High Frequency) | EHF (Extremely High Frequency) |
| Broadcasting | Earth exploration-satellite | Radiolocation | | |
| Amateur | Space operation | Space research | | |
| Radio astronomy | Inter-satellite | Fixed | | |

Note: The division of frequencies between services and the usage indicated in the picture only gives an overview of the frequency utilisation. More detailed information can be obtained from FICORA's Regulation 4 and the annexed Frequency Allocation Table (links from this picture).
