

Regulation

ON NUMBERING IN THE TELEX NETWORK

Issued in Helsinki on 20 October 2010

The Finnish Communications Regulatory Authority (FICORA) has, under section 47 of the Communications Market Act of 23 May 2003 (393/2003), prescribed as follows:

Section 1

Scope of application

This Regulation applies to numbering in the telex network. The numbering complies with the Recommendations U.7 and F.69 of the International Telecommunication Union (ITU).

Section 2

Granting the right to use a number

FICORA grants, on application in writing, a telecommunications operator a right to use the numbers referred to in this Regulation.

In the application, the telecommunications operator shall give its name, business ID and contact information as well as the number range or number which is being applied for.

Section 3

Structure of a number

Closed numbering is used for telex networks in Finland. The telex number is composed of a country code and a national number. The ITU has assigned to Finland the Telex Destination Code (TDC) 57 and the Telex Network Identification Code (TNIC) FI.

An international telex number containing the country code may not be longer than 12 digits. The maximum length of a Finnish national telex number is 6 digits. FICORA may, for a justified reason, grant a right to use longer numbers.

Numbers beginning with 1 to 8 are used for subscriber numbers in the telex network. The international prefix is 99.

Section 4

Entry into force and transitional provisions

This Regulation enters into force on 1 January 2011 and will remain in force until further notice.

Section 5

Information and publication

This Regulation is included in the Series of Regulations issued by the Finnish Communications Regulatory Authority and it can be obtained from the FICORA Customer Service Office:
