INSTRUCTIONS

Type approval of radio equipment and approval of an individual piece of radio equipment is granted based on the Radio Act (2001/1015) and the FICORA Regulation No. 1, issued by the Finnish Communications Regulatory Authority. Approval is needed only for radio equipment not covered by Directive 1999/5/EC.

The fees laid down in the relevant statute issued by the Ministry of Transport and Communications will be charged for the approval. The basic charge for a decision on type approval is 285,90 € and for an individual approval **84,10 €**. If the type approval is complex and time-consuming or if it also covers equipment variants, an additional fee is charged based on the number of working hours used. The approval fee is billed when the approval is completed.

The tests to be performed because of the type approval shall be carried out in an accredited test laboratory or another competent test laboratory.

Approval of an individual piece of radio equipment may also be granted based on a national type approval by another country.

- Notes:**
- 1) In the approval of an individual piece of radio equipment, the Serial No. of the equipment shall be entered in this field.
 - 2) Where needed, test reports and/or certificates shall be annexed to the application.
 - 3) These documents shall be annexed to the application if they are not already annexed to the test report.
